- ✓ High security auto-fire multi-point locking system
- ✓ British Standard 3 Star Kitemarked, Sold Secure Diamond Standard euro cylinder
- ✓ Fully accredited to and passed to PAS-24: 2022 security standard
- ✓ Secured by Design option available
- ✓ £5000* Guarantee against break-in through lock failure

GRP Doors

GRP (Glass Reinforced Polymer) Composite Doors with Energy-Saving Foam Core Technology

Our composite doors create an appealing entrance to any home, with its grained GRP outer skin and high-performance paint finish will look stunning for the years to come.

But the true benefit of our GRP doors comes in the structure and composition of our door and the energy efficient PVCu door frame,

Under the GRP door skin is a high-density energy-saving foam core encapsulating a hardened barrier to produce a door incorporating enhanced security whilst providing outstanding thermal performance, this allows them to achieve an excellent U-value (a measure of heat transfer) of 1.4 or less to maximise their efficiency.

When this is fitted into our multi-chamber, thermal reinforced door frame you can be sure the door installed into your home not only looks stunning but is also one of the most energy efficient doors on the market today.

Locks & Security

Auto-Fire Multi Point Lock

Standard

Heritage

Our doors feature high security Auto-Fire locking technology which removes the requirement of lifting the handle to engage the 20mm security deadbolts. This ensures our doors are easy to operate and only require the turning of the key or thumb-turn to lock the door and secure your home.

Optional Thumb Turn Euro-Cylinder

For easy operation we also offer the option of an internal thumb-turn cylinder to replace the key.

The thumb turn ensures exit from your home can be done quickly in the event of a fire without the requirement to find a key. However, unlike other thumb turn cylinders which go into permanent lockdown mode after an attempted break-in. Our thumb turn features a push button to disable the lockdown mode and ensures a quick and safe exit from your home.

Standard Heritage

High Security Euro-Cylinder

The BSI 3 Star Kitemark, Sold Secure Diamond Standard Euro Cylinder offers maximum protection against all forced methods of attack ranging from snapping, drilling, plug-extraction, picking and bumping.

It's also engineered with a sacrificial point. When tampered with externally sets an interlocking cam mechanism into action and goes into lockdown mode.

ANTI-SNAP

PLUG EXTRACTION PROTECTION

ANTI-PICK

ANTI-BUMP

ANTI-DRILL

ANTI-SAW

Complete with 5 keys

Everyone of our doors comes complete with 5 keys and the 10-year warranty registration card as standard.

* Follow the registration instructions to activate your warranty guarantee and order extra keys as required.

AI Secure Home Owner Guarantee

**AI SECURE
GUARANTEE**

Our lock manufactures are so confident in their products and the strength of our composite doors they have combined their individual break-in guarantees. In the event of a burglar gaining entry to your home through failure of their products they will pay you, the homeowner **£5000***

Scan Me

AI Secure

Locks & Security

We also offer a range of alternative Multi-Point Door Locks & Euro-Cylinder

Yale 3 Hook Lockmaster (PAS24)

This traditional lift lever / lever lock features 3 anti-separation hooks at the top, bottom, and centre of the lock plus an additional latch for maximum security.

It also features a dual follower (twin spindle) which allows the use of an external moveable pad (lever pad) handle which allows the operation of the hooks but restricts operation of the latch to key only to stop casual intruders.

Ultion 3*PLUS Euro-Cylinder

This euro-cylinder remains one of the strongest cylinders available, is packed with the latest in anti-break in technology and comes complete with a £5000* guarantee. It is available with 3 or 6 keys and as the option of key / key or thumb turn.

*guarantee require registration to activate.

Winkhaus autoLock AV4 (PAS024)

This award-winning lock features Auto-Fire locking technology and removes the requirement to lift the handle as the high security hooks engage automatically as the door is closed and requires 40% less operational force when used as a key only operation that other door locks. It can be used with a standard lever / lever handle for traditional operation, or as a key only entry with a fixed external lever handle or a cylinder escutcheon and bar handle.

The lock is available with the cylinder in the standard central position but also offers the higher "Heritage" location associated with key only entry and offers the option of a unique day/night switch.

This unique day/night switch temporary disengages the Auto-Fire feature and allows re-entry without the key when you are just popping out to your car or to talk to your neighbour.

Locks & Security - Smart Technology

Tedee Pro

Keyless Entry: Say goodbye to traditional keys. Our smart lock system allows you to unlock your door with your smartphone or even set it to unlock and lock automatically when you approach by In-App features. The Tedee Pro offers seamless automated locking and unlocking and ensures your home is always secure whilst also allowing you total control by providing "Virtual Keys" that you can create and send via the app with precise access settings limiting when and how these keys will work. The Tedee Pro is available in black or silver/white and comes complete with 5 keys for manual operation.

The optional accessories of a wireless Keypad can also be used to unlock your door. The optional Bridge allows you to have total control from anywhere in the world by monitoring your door and alerting you to its operation.

Video of Tedee Features

Ultion Nuki Plus

The Ultion Nuki Plus is a combination of the Nuki keyless entry system, Ultion euro-cylinder and internal lever, paired with the external lever to give ease of operation.

Offering timed virtual keys and monitored through the app for total control on who and is available in black or silver/white and comes complete with 3 keys for manual operation.

The optional accessories of a handy fob, wireless keypad featuring fingerprint recognition ensures your access is guaranteed.

Door Edge-band Colours

We believe the quality of our doors should never be compromised

All of our doors are finished on all 4 sides by a colour co-ordinating or grained edge-band to ensure the appearance of your door is maintained, even when the door is open.

This aesthetically pleasing finish to your door is also 100% moisture resistant and will ensure your door retains its appearance and finish.

White grained edge-band comes as standard but where doors are open out or coloured internally this will be changed to the most sympathetic colour match possible.

Sizing

As all custom number and names vary in length, font sizes will change dependant on the number of characters used. The general rule of thumb is that every 1 inch (25mm) of letter height provides 10ft (3 meters) of readability with the best impact

Where possible we recommend number and lettering (except street names on sidelights) with a minimum of 150mm in height which will make them easily readable from 60ft (18meters) distance.

To calculate the size of lettering we use the following ratio as standard:

Width of glass (mm), minus 100mm, divided by the number of characters including spaces.
